How do we get more families back into the core of our city?

Nearly all of the schools in our Ward (Downtown, University, Southgate, Riverbend) have fewer and fewer families living in surrounding neighbourhoods. Fewer students in the catchment areas put our schools at an ongoing risk of closure now and in the future.

As citizens, this is economically inefficient as these neighbourhoods are built for families. We have billions of dollars of infrastructure in the core of our city (including our playgrounds, schools, parks and pools, libraries, and roadways) but there are fewer families moving into our neighbourhoods. What can we do to bring more families back into Ward F?
